Frequently Asked Questions:

Why should I **outsource** my financial processing?

Most small and medium business owners do not have the knowledge, time or ability to effectively perform their bookkeeping duties. Outsourcing will provide you with the time required to focus on your business operations.

What **software** will I need?

You will need to use the Greentree accounting software package via the cloud - as supplied by bizlinkIT. bizlinkIT have other additional software programs that assist with the bookkeeping process such as invoicelink, tillink and paylink - but these are optional.

How does our information flow change?

Documents will be scanned (usually at the business) through and placed on a secured server called bizDocs. The business or Head Office will do the scanning. We will provide you with a checklist of what and how to send along with a "Tools of the Trade" pack.
Note: 85% scanning success rate must be met under these instructions.

What types of **documents** are accepted through bizDocs?

Accepted document types are: invoices, supplier statements, bank statements, credit card statements, merchant statements, till or daily sales reports, end of month reports, financial reports, PBS statements and remittance advices.
No scripts are permitted - per privacy laws.

Included in EMA package from as little as \$1,200/month:
